

Manuscript #22774 - **Performance Characteristics of Retrograde Single-Balloon Endoscopy: A Single Center Experience**

All of the reviewers concerns, listed below, have been addressed in the revised manuscript. Please see attached manuscript for verification.

- *In addition, a copy of any ethical approval document(s)/letter(s) or waiver should be provided to the BPG in PDF format. -- ATTACHED*
- *Any research article describing a study (clinical research and case report) involving humans should contain a statement in the title page clearly stating that all involved persons (subjects or legally authorized representative) gave their informed consent (written or verbal, as appropriate) prior to study inclusion. In general, the BPG requires that any and all details that might disclose the identity of the subjects under study should be omitted or anonymized. In the rare situation that a study participant's identifiable information is crucial to the case presentation, the statement of informed consent is absolutely necessary, unless the participant is deceased. In addition, a copy of any approval document(s)/letter(s) or waiver should be provided to the BPG in PDF format. – IRB ATTACHED, CONSENT STATEMENT INCLUDED*
