World Journal of Dermatology: **ESPS Manuscript NO: 22898**

**Title: Unraveling oral psoriasis and its relationship with geographic tongue:
A literature review**

Dear Editor:

I am pleased to submit this manuscript after revising it based on the reviewers' comments. The modifications in the text are highlighted as requested to facilitate identification. We appreciate your comments and suggestions. Please let us know whether we need to make any further revisions to the manuscript.

I look forward to hearing from you soon.

Sincerely,

Bruna Lavinias Sayed Picciani

Given below are the responses to the reviewers' comments.

Reviewer #1 - 00646507

Comment 1. Complete revision on oral psoriasis. I suggest minimal changes: 1) Delete in the abstract, line 36 "it is of great importance...practice" 2) Delete in the abstract, line 37-39 "some authors...disease" 3) Ref 1 is not necessary, it is a prevalence study on psoriasis and hidradenitis suppurativa.

Response 1. Thank you for the valuable comments and compliments. We agree with your opinion and have changed the text and references.

Reviewer #2 - 00646537

Comment 1. Relatively well written, but does not really convey too much that is new. The authors could have focused a bit more on the newer references related to immunological/ immunohistochemistry. There is a lot of repetition in different sections. Try to delete the redundant material. Need a second look for grammar/syntax

Response 1. We thank the reviewer for this comment. As per the reviewer's suggestions, we have added news references related to immunological/immunohistochemistry. We apologize for overlooking this aspect. Note that the manuscript has been checked again for language and grammar by a native English speaker who specializes in editing scientific papers.

Reviewer #3 - 00725728

Comment 1. Nice overview of oral psoriasis which is often neglected. A good reminder to clinicians. But there is nothing new added to a known subject. Need to polish on grammar constructions.

Response 1. Thank you for the valuable comments. We agree with your opinion and have revised the grammar constructions.

Reviewer #4 - 00646491

Comment 1. This a comprehensive, well-written review of clinical, histological, and immunogenetic association of geographic tongue and psoriasis.

Response 1. We thank the referee for this comment.

Reviewer #5 - 00646460

Comment 1. Please see comments above.

Response 1. Thank you for the valuable comments. We agree with your opinion and have revised the language of the document.
