Name of Journal: *World Journal of Methodology*

ESPS Manuscript NO: 23185

Manuscript Type: Review

Referee 1:

A) *The reviewer has only some minor comments as follows. There are several improper words or sentences in this manuscript:*

Page 3: ... (ABC) proteins, that are... ("that" (delete ,) or ", which")

Page 4: ..., an inadequate resolution induce chronic...(induces)

Page 5: ...extracellular matrix (EM)... (ECM is suggested)

Page 6: ...Hypoxia play a key role... (plays) Page 11: ...recent research have investigated... (has)

Page 13: ...characterized by a different tissue... ("different" (delete a))

Page 13,14: ...TNFa... (TNFalpha)

Page 14: ...PPAR γ activation repress MnSOD expression... (repressed)

Page 15: ...are modulate by vitamin D... (modulated)

Page 15: ...BRCA1 expression, that is the most... (("that" (delete ,) or ", which")

Page 17: ...while inducing less side effects in patients... (fewer) 2.

Answer A1: the manuscript was extensively revised by a native speaker

B). *In Figure 1, the addition of the full name for abbreviations can enhance the comprehension.*

Answer B1: as suggested we added the full name for abbreviations in figure legend.

Referee 2:

An interesting review article. Language polishing is required. For instance:

a rare cells population;

to give (rise to) new tumors;

similar characteristics with (to) normal;

an inadequate resolution induce(s);

Hypoxia play(s) a key role; a molecules;

Nuclear hormone receptors (NR) family consists of 48/49 (human/ mouse) includes receptors for; etc.

Answer 2: the manuscript was extensively revised by a native speaker.

Looking forward to hearing from you,

yours sincerely
