Manuscript Type: Systematic Reviews

Use of carbon dioxide as an intravascular contrast agent: A review of current literature

Fahad Ali, Muhammad Asif Mangi, Hiba Rehman, Edo Kaluski

Answering to the Reviewers' comments:

**Reviewer's comment:** This is a review article about the clinical application of CO<sub>2</sub>-based angiography. The authors overviewed recent studies, and described how it works with safety concerns. It must be beneficial for many readers. I recommend they explain Figure 2 more clearly, as the sentences in Page 4-5 are hard to understand. Page 7 Please define AV.

**Author:** Addressed and changes made. AV defined.
