

Dear editor,

After a thorough review of the manuscript and after adding the peer-reviewers' and editor's suggestions, I am sending the final edited version. The manuscript was also submitted to language revision and received a language-editing certificate from a professional English language-editing company (AJE). Please find highlighted in the file these main changes:

- I have provided a table disclosing the advantages and disadvantages of each HER2 testing method as it was suggested (Table 1).
- I have edited the format of numbering citations.
- I have sent the Figure 1 (algorithm) in ppt. (as a separate file)
- I have also subtly polished some parts of the text according to AJE suggestions.

Thank you for considering this edited manuscript for publication.

Sincerely,

Lucas Faria Abrahao-Machado.
