

8<sup>th</sup> April, 2016

Dear Editor,

Thank you, and the reviewers, for the valuable comments as well as the constructive criticisms of our manuscript “**HCV genotype 3: Meta-analysis on Sustained Virologic Response Rates with currently available treatment options**”.

The following pages contain our itemized responses. Where necessary we have made appropriate changes in the text and highlighted them in red to facilitate the review process. Hopefully the changes we have made have improved the quality of the manuscript sufficiently for its acceptance for publication by the Journal.

We look forward to your opinion on the revised m/s,

Yours sincerely,

Manuel Romero-Gómez, Full Professor,

Head of Inter-Centre Unit of Digestive Diseases.

Virgen Macarena - Virgen del Rocío University Hospitals. Sevilla, Spain.

**Editor's comment:**

**Point 1:** If the authors are non-native speakers of English, then the No. 11 document must be provided as well.

**Response:** The manuscript has been extensively edited by K. Rajender Reddy, who is native speaker English.

**Reviewer 1:**

**Point 1:** The meta-analysis HCV genotype 3: Meta-analysis with available treatment options is an important topic and of high scientific significance. The results were interesting and valuable to communicate. This study will help future work in the treatment of HCV. Statistical analysis reported in this manuscript are well done The paper is well written in sound language and organized.

**Response:**
