

ANSWERING REVIEWERS

Title: What does irritable bowel syndrome share with nonalcoholic fatty liver disease?

Author: Antonella Scalera, Matteo Nicola Dario Di Minnom, Giovanni Tarantino

Manuscript No: 2522

The manuscript has been improved according to the suggestions of reviewers:

1. Format has been updated
2. Revision has been made according to the suggestions of the reviewer

1) First of all, make clear the figure 1, 2, 3, especially figure 2 is within copyright of author. Figure 2 looks like professional touched figure. Please make sure.

They were eliminated due to the lack of permission

2) Too long though detailed review contents. Some portion of description can be merged or shortened.

The manuscript has been shortened in some parts

3) The figures look like apart of main contents of this review series.

The Figures were eliminated

4) Mostly should be focused on the title of manuscript "WHAT DOES IBS SHARE WITH NAFLD ON THE INFLAMMATORY AND IMMUNE SYSTEM SIDE?". Fundamental and separate description of diseases can be omitted or shortened.

The various pieces were integrated in few sections

5) Coherence in description should be continued because current description seems to be somewhat separated.

A strict link has been set to combine different descriptions

3. References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,
