Title: Carcinoma in gut-associated lymphoid tissue in ulcerative colitis
Case report and review of literature

Author: Carlos A. Rubio, Ragnar Befrits, Jannis Ericsson
Name of Journal: *World Journal of Gastrointestinal Endoscopy*

ESPS Manuscript NO: 2537-review

The manuscript has been improved:

1. Format has been updated
- 2 Revision has been made according to the suggestions of the reviewer (page 9):

This report is limited by the rarity of these tumors. Notwithstanding, the awareness that colonic carcinomas may evolve in mucosa-associated lymphoid tissue should encourage endoscopists to methodically examine areas with GALT complexes, particularly in patients with UC.
