Editor Notes

Overall, this article

was very clearly presented and the content was quite easily understood. Although a few parts required some correction to improve the grammar or clarify the language and expression, it was generally very well written. In the comments, you will find explanations for some of my changes and questions/suggestions for further clarification/revision. I have also offered some vocabulary suggestions in the comments. When it comes to the formatting of your text, I would suggest that you use either 'straight' quotes or 'curly quotes' – not both, and pay attention to your use of italics and the capitalization of certain terms.

Other than that, this

was great work and I hope you found this helpful. Good luck with your very interesting research!

Thank you for your feedback!
