To whom it may concern:

Thank you for consideration of our manuscript, titled “Return to Sports after Shoulder Arthroplasty” for publication as a review in the *World Journal of Orthopedics*. We have revised the manuscript according to the reviewer’s comments, as outlined in the table below. We would be happy to further discuss any specific details of our study if requested.

<b>Reviewer’s Comment</b>	<b>Author’s response</b>
1. “offer”	No change to text required
2. “offer”	No change to text required
3. Authors’ full names should be given first, then the complete name of institution, country, city, province and postcode.	Country and postcode have been added to author information below and on the title page
4. Don’t need <b>Background: Methods:</b> and so on,,,	Change made to text accordingly
5. Please write a summary of less than 100 words to outline the most innovative and important arguments and core contents in your paper to attract readers. <b>Audio Core Tip</b> Please offer the audio core tip, the requirement are as follows:	Core tip included (please see below) and audio file uploaded.  Many patients

<p>In order to attract readers to read your full-text article, we request that the first author make an audio file describing your final core tip. This audio file will be published online, along with your article. Please submit audio files according to the following specifications:</p> <p><b>Acceptable file formats:</b> .mp3</p> <p><b>Maximum file size:</b> 10 MB</p> <p>To achieve the best quality, when saving audio files as an mp3, use a setting of 256 kbps or higher for stereo or 128 kbps or higher for mono. Sampling rate should be either 44.1 kHz or 48 kHz. Bit rate should be either 16 or 24 bit. To avoid audible clipping noise, please make sure that audio levels do not exceed 0 dBFS.</p>	<p>prioritize the ability to return to sports following shoulder replacement surgeries, including total shoulder arthroplasty, reverse total shoulder arthroplasty, and hemiarthroplasty. While activity levels after hip and knee replacements have been well-established in the literature, studies on this topic in the field of shoulder arthroplasty are relatively limited. Information about activity levels and the rate of return to sports following shoulder arthroplasty would help both patients and surgeons more accurately manage expectations. This clinical review examines how return to sport following shoulder arthroplasty has been studied and reported in the literature.</p>
<p>6. The reference number is in front of the full stop, check all the text!</p>	<p>All text was checked and references were cited before sentence end per instructions</p>
<p>7. Please reformat all the reference numbers like this. Please check throughout. Thank you! The Authors</p>	<p>All reference numbers were</p>

<p>should put the number of the references in Arabic numerals according to the citation order in the text. Put reference numbers in square brackets in superscript at the end of citation content or after the cited author's name. For citation content which is part of the narration, the coding number and square brackets should be typeset normally. For example, "Crohn's disease (CD) is associated with increased intestinal permeability<sup>[1,2]</sup>."</p>	<p>reformatted</p>
<p>8. Please add PubMed citation numbers and DOI citation to the reference list and list all authors.
