### Reviewers response:

Well organized review. Here are my suggestions: 1. Add individual subtitles under 'Pathophysiology'  
2. Expand on the treatment of PPH, a table that includes classes of medications and their mechanism may be of help.

Response: We appreciate the reviewers input. We have added the subtitles under the pathophysiology section. We have also created the table for PPH treatment and classes of medication as suggested.

Editor Comment as track changes:

We have addressed all issues as well as have corrected the language as suggested.

We like to thank the reviewer and the editorial staff for their time and support. We hope that readership will enjoy reading and will learn from this article.

Warmest regards

Salim Surani, MD
