Human Embryonic Stem Cell Therapy

We hereby place on record that the Institutional Ethics Committee (IEC) of Nutech Mediworld has approved publication by Dr. Geeta Shroff of the work carried out at Nutech Mediworld relating to the establishment, expansion and storage of the human embryonic stem cell (hESC) lines and therapeutic transplantation of hESC into patients. The IEC has further said that the interests of the intellectual property rights must be safeguarded and the publications may be co-authored by relevant experts.

The Committee was further of the view that the studies that would be carried out should not be regarded in the nature of clinical trials but should be considered as retrospective studies containing analysis of clinical data generated while the patients underwent the therapy, as also statistical analysis of such data. Any prospective studies that may be undertaken would, again, not be in the nature of clinical trials. The scientific and statistical integrity of the data must be maintained.

Dr. Bhupinder Singh (Chairman, IEC)

Mrs. Jharna Dasgupta (Member, IEC)

Adv. S.S. Sobti (Member, IEC)

Mr. P.P. Shrivastav (Member, IEC)

Ms. Jyoti Dhanda Titus (Member Secretary, IEC)
