

ANSWERING REVIEWERS

Dear Editor,

Enclosed please find the revised version of our manuscript (25911) entitled "Entrapment neuropathies in diabetes mellitus", by my self and Nicola Morelli.

As requested, I have answered the reviewers on an item-by item basis (see below).

We would appreciate this manuscript been now considered for publication in "*World Journal of Diabetes*".

Considering the manuscripts seems to quite long and exhaustive, we wonder if you could possible accept it as a Review instead of Minireview.

Thank you for your consideration.

Sincerely,

Eugenia Rota, MD
