

RESPONSE TO REVIEWERS

Thanks to your valuable suggestions, we think our article is now better. We corrected our article in accordance with your suggestions.

REVIEWERS 1:

1. PSE can be particularly useful in high-risk surgical patients, such as those with comorbid diseases [23-26].

批注 [C1]: The point is not clear, where and how it is useful, need to specify

ANSWER:

We corrected according to your suggestions and explained where and how it is useful, need to specify

2. cytopenia was defined as a platelet count of $\leq 60 \times 10^3/\text{mm}^3$ and/or a leukocyte count of $\leq 3.0 \times 10^3/\text{mm}^3$.

批注 [C2]: How the cytopenia was defined , need valid reference against the definition of cytopenia and what about RBC count and HB

ANSWER:

According to our literature, search cytopenia criteria had been defined as mentioned, related reference was added.
