

July 18, 2016

Dear Editor,

Pleased find enclosed the edited manuscript in Word format (file name: 27452.edited.doc)

Title: A review of endoscopic radiofrequency in biliopancreatic tumours with emphasis on clinical benefits, controversies and safety future perspectives.

Authors: María-Victoria Alvarez-Sánchez, Bertrand Napoléon

Name of journal: World Journal of Gastroenterology

ESPS Manuscript Nº: 27452

The manuscript has been improved according to the suggestions of reviewers:

- 1.- Format has been updated.
- 2.- The manuscript has been edited and a language polishing performed.
- 3.- Revision has been made according to the comments of the reviewer 00053419:

Thank you for your feedback. According to your comment, we would like to say protein denaturation instead protein desaturation on page 5 and this is now corrected. Regarding the criteria for inclusion of the selected papers, on page 8 we have remarked that owing to the paucity of articles on this subject we considered all types of evidences including case reports and relevant abstracts reporting on technical feasibility, clinical outcomes or complications of endoscopy-guided biliopancreatic RF.

4. – Revision has been also made according to the suggestions of the reviewer 00058573:

Thank you for your comments. As you have suggested, the epigraph about the different types of probes has been shortened.

Thank you again for publishing our manuscript in World Journal of Gastroenterology.

Sincerely yours,

María Victoria Alvarez-Sánchez MD
