LANGUAGE EDITING

This is to certify that I have reviewed the manuscript entitled **“Polymorphisms and resistant mutations of HCV on sequences in the European Hepatitis C Virus Database (euHCVdb)”** for grammatical clarity and appropriate vocabulary. I have lived and worked in English-speaking countries (USA) last year, where I also earned part of my PhD degree.

Dr. Charles Wood, one of the authors, have also reviewed the manuscript; he is a professor in University of Lincoln-Nebraska (USA), and is an editor with over ten years of experience in academic editing of scientific and medical manuscripts.

Sincerely,

Dimas Alexandre Kliemann
