

## ANSWERING REVIEWERS

May 09, 2013

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 2808-edited.doc).

**Title:** Endoscopic appearance of AIDS-related gastrointestinal lymphoma with c-myc rearrangements: case report and literature review

**Author:** Shohei Tanaka, Naoyoshi Nagata, Sohtaro Mine, Toru Igari, Taiichiro Kobayashi, Jun Sugihara, Haruhito Honda, Katsuji Teruya, Yoshimi Kikuchi, Shinichi Oka, Naomi Uemura

**Name of Journal:** *World Journal of Gastroenterology*

**ESPS Manuscript NO:** 2808

**We wish to express our appreciation to the Reviewer for the insightful comments, which have helped us to significantly improve our paper.  
The manuscript has been improved according to the suggestions of reviewers:**

### 00410327 Comments

The manuscript is quite well written. The methods are adequate. The results justify the conclusions drawn. It would be useful for the readers to include the discussion of PMID:10535873.

#### To Authors

Answer: Since we understand the review's suggestion, we cited that *H. pylori* infection and MALT development as reference number: [20]. We added the sentence into case and discussion section as follows:

#### Case

The patient was *Helicobacter. Pylori (H. pylori)* negative with the titer of the *H. pylori* antibody under 3.0 U/mL.

#### Discussion

Previous study has shown that *H. pylori*-induced T-cell plays an important role in gastric mucosa-associated lymphoid tissue lymphoma development. However, *H. pylori* was negative in this case, thus other mechanisms have been suggested.

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely,

Shohei Tanaka, M.D.
