

## **Response Letter**

Dear Ze-Mao Gong,

Dear Reviewers,

We would you like to thank you for reviewing our paper called “a rare case of primitive embryonal duodenal carcinoma in a young man” that we submitted for publication as “Case Report” on World Journal of Gastroenterology (manuscript number 28625).

We listen to yours precious comments to enhance this article and modifications are highlighted in Yellow.

First of all, we modified the sentence about the gastroscopy to make it more understandable. Anatomical terms were corrected (hepatic hilum, portal lamina, hepatic common artery). We mentioned that the main bile duct was, after pancreaticoduodenectomy, anastomosed to the jejunum. All the abbreviations were corrected to be fully spelled when first mentioned. About the figures, we placed arrows and asterisks to make it more understandable.

We expect that the revised manuscript will fully satisfy our reviewers.

Best regards,

Dr Barbieux

Dr Memeo
