IRB Nurse Manager
Lynne.paul@beaumont.org

Dear Lynne:

We want to submit a SINGLE case report entitled "Presentation of mucinous appendiceal adenocarcinoma as malignant cecal-to-sigmoid fistula after appendiceal rupture without clinically evident pseudomyxoma peritonei at intraoperative diagnosis or at 9 months postoperatively: Case report & literature review" by Seifeldin Hakim, M.D., Mitchell S. Cappell, M.D., Ph.D., et al.

Until now all single case reports were exempted from IRB approval. Is this still the case? Thank you very much.

Sincerely yours,

Mitchell S. Cappell
