

Dear Editor in chief WJG

We thank you and the reviewers for the fair and thoughtful review. We are pleased to re-submit a new version of the manuscript which includes the suggestions of the reviewers

We have made all changes in the text according to the suggestions of reviewers.

We hope our revised manuscript will be acceptable for publication.

Yours sincerely

Evangelos Cholongitas

1. Reviewer 1

Authors concisely summarized the current literature on the mechanisms and role of obeticholic acid (oca) for treatment of nafld. ? suggest to add a section about the difference between udca and oca including a figure showing molecular structure of them.

Thank you. I have added a section regarding UDCA and OCA as well as a figure (page 5).

2. Reviewer 2

Core tip is not differentiated from abstract. Please highlight the most innovative and important findings.

Thank you. We have changed the core tip.

3. Reviewer 3

I appreciate the authors' challenge trying to summarize the latest topic, FXR agonist for NAFLD. No critical problem was detected in the manuscript.

Congratulation!

Thank you
