

25th September 2016

To Whom it may Concern:

In my capacity as a mother tongue English speaker, I certify that the revised version of the review article entitled:

Fatty liver is associated with an increased risk of diabetes and cardiovascular disease. Evidence from three different disease models: NAFLD, HCV and HIV

by A. Lonardo and Colleagues,

is written in idiomatic English and ready to be published in World Journal of Gastroenterology

Yours faithfully,

Jacqueline Mole
