

## **Answering Reviewers**

Dear editor,

First of all, thank you very much for your review.

I had modified my article according to you suggestions as follows:

1> I had removed the section about “the explanation about the pathogenesis of IBS” and added new references from literature published in Allopathy.

2> I had cut the co-corresponding authors down to one corresponding author.

3> The Copyright Assignment had been submitted.

Best regards,

Yang Cheng,
