

**Name of Journal:** World Journal of Gastrointestinal Pathophysiology  
**ESPS Manuscript NO:** 29838  
**Manuscript Type:** Basic Study

**Combination curcumin and vitamin E treatment attenuates diet-induced steatosis in Hfe<sup>-/-</sup> mice**

**Answering Reviewers:**

**Manuscript's content is interesting, overall well written and timely:** We thank the reviewer for their comments on our manuscript.

**Scope should be more concisely expressed; Limitations of the model should be addressed:** We have added a section to the discussion commenting on scope and limitations of the study.

**Pathophysiology, possible mechanisms of disease and of intervention effectiveness, should be more explicitly considered, also with a scheme, if possible:** We thank the reviewer for their suggestion, we have added a section to the discussion to highlight the potential mechanisms of action of the therapy.
