

Supported by The French National Center of Scientific Research (CNRS, PEPS, ECOSAN, INEE). Our research center simply receives the funds.

As authors specified in the first revised version of the manuscript, unfortunately, our institution (CNRS) does not provide PDF documents proving grant approval. Our laboratory simply receives the funds, and use it within one year to perform the study. Authors hope that this situation will not be a problem for World Journal of Diabetes.

Sincerely yours,

Priscilla Duboz, on behalf of the co-authors.
