

Dear Sir/Madam,

I followed the advice to perform the following changes:

- 1- We reviewed the paper for typographical or grammatical errors.
- 2- We omitted the sentence "it is wiser to not smoke from the start" from the conclusion.

About writing a summary, we already prepared abstract, conclusion and core tips. We think that this already summarized our work to the degree that any further summary will be only a repetition of what is written. However, we are happy to receive any further comments from the reviewers.
