Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 3084-review.doc).

Title: miRNAs may solve the mystery of chronic hepatitis B virus infection

Author: Yingfeng Wei, Guangying Cui, Ping Ye, Jianing Chen, Hongyan Diao

Name of Journal: *World Journal of Gastroenterology*

ESPS Manuscript NO: 3084

The manuscript has been improved according to the suggestions of reviewers:

1 Format has been updated

2 Revision has been made according to the suggestions of the reviewer

(1) We have removed some well known information. For instance, we removed the section of "Biogenesis and action mechanism of miRNA" and simplified the section of "host-virus interaction at the miRNA level". In addition, we restructured the introduction and conclusion. These modifications can help limit our focus on miRNA related with HBV.

(2) To make this review to be more informative, we have redrawn figure 1 and added a new figure named figure 3. These figures can help the readers to understand the sentences.

(3) Our manuscript had been edited by "American Journal Experts: <http://www.journalexperts.com>"

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Gastroenterology*.

Sincerely yours,

Hongyan Diao
