

## **Institutional Review Board Statement**

This case report was exempt from the Institutional Review Board standards at Hull and East Yorkshire NHS Trust, Hull, United Kingdom. Ethical approval was not required, since the patient underwent a clinically indicated diagnostic cardiac catheterization. This procedure was performed after the patient had been informed in detail about potential risks and had given informed consent.

A handwritten signature in black ink, appearing to read 'K Aznaouridis', with a long horizontal stroke extending to the right.

Dr K Aznaouridis

(on behalf of the co-authors)
