

Answering Reviewers

27 December 2016

Name of Journal: World Journal of Gastroenterology

Manuscript NO.: 31080

Title: Inflammatory Bowel Disease: An Evaluation of Health Information on the Internet.

Authors: Samy A Azer, Thekra I AlOlayan, Malak A AlGhamdi, and Malak A AlSanea

Dear Editor

Thank you for your email dated 24 December 2016 and the reviewer's report. Also I would like to thank you for the summary provided in your letter about the changes needed and the submission steps and documents required by the journal. To facilitate the review process, all changes made are in blue colour and underlined (track changes). Below I have addressed in a point-by-point format the points raised by the reviewer and the Editor.

Reviewer's comments

We would like to thank the reviewer for his/her valuable comments that helped in improving the manuscript.

- The point raised by the reviewer has been considered and added to the limitations of the article.
- The "Pearson" method was used and the sentence has been amended.
- The suggestion of the reviewer regarding the interpretation of Cohen coefficient has been added.
- The statistical analysis numbers have been omitted from the discussion as suggested.

Editor's comments on the manuscript

All changes suggested by the Editor have been addressed and completed. The whole manuscript including the citations and references has been reviewed to match the requirements of the journal.

Editor's letter

The 9 steps stated by the Editor in his letter have been addressed as requested. The submission needed (NO. 1 to 10) have been submitted with the amended manuscript.

I trust that the amended version will be found acceptable by the Editor. I look forward to hearing from you.

Best regards,

Professor Samy A Azer

MD, PhD(USyd), FACG, MPH (UNSW), MEd (UNSW)

Professor of Medical Education
