

ESPS Manuscript NO: 31098

Impact of creatinine methodology on glomerular filtration rate estimation in diabetes

### **Biostatistics Statement**

The statistical methods in this study were performed by the authors: Marijana Vučić Lovrenčić and Vanja Radišić Biljak, Merkur University Hospital, Zagreb, Croatia, with a MedCalc statistical software (version 12.7.8; Ostende, Belgium) licenced to Marijana Vučić Lovrenčić. Statistical methods used for the analysis of results were selected according to data distribution and general statistical principles for the method-comparison studies.
