Dear Ms Chaudhury

Re: Lower Limb Intracast Pressures Generated By Different Types of Immobilization Casts

Thank you for sending through the details of your project. I can confirm that this project falls outside of the governance arrangements for National Health Service Research Ethics Committees in that the project does not involve NHS patients as participants. This project does therefore not require NRES ethical review. The details of which projects do require NRES review can be found on this link.

<http://www.hra.nhs.uk/resources/research-legislation-and-governance/governance-arrangements-for-research-ethics-committees/>

In addition, having reviewed the project there are no ethical issues that require review at any other ethics committee.

Yours sincerely,

Fiona Parker
Research Support Services Manager
