COMMENTS TO AUTHORS

This is an interesting case report about the endovascular treatment of paravisceral mycotic aneurysm. English editing is necessary, as there are many typographical errors throughout the manuscript.

COMMENTS TO AUTHORS

The authors reported a case of paravisceral mycotic aneurysm, which was performed by endovascular therapy. This case report is interesting. As a reviewer, I have two requests. #1 The content of case report is interesting, however, the whole of manuscript, especially in the "Discussion" section, were subdivided into smaller paragraph. The authors had better subdivide their manuscript into larger paragraph. #2 The present manuscript had no abstract section. In addition, the references were not expressed, based on the contribution rule of "WJC". The authors revised their manuscript according to the contribution rule fo "WJC".
