Answer to the reviewer 02533298:

Thank you very much for your advices, I have corrected these mistakes in the revision.

1. I have used "Because of the high rarity" instead of "because of the highly rare morbidity" in core tip.

2. I have moved final 2 sentences regarding patient's history to the first paragraph with the rest of the history as reviewer suggested. I have used "a smoker of 40 pack-years" instead of "40 packs per year".

3. The reason for resecting the metastatic parotid gland with a full lymph node dissection is that the pathology of the parotid gland neoplasms is not clear and there were only solitary parotid gland and local cervical lymph node metastasis detected by PET/CT. And I have added it in the text.

4. Twenty days after the surgery on the parotid gland, the patient received computed tomography (CT) imaging of the neck, thorax and abdominopelvic area; no recurrence or metastasis was observed. So then he started the first (of 6) cycle of chemotherapy. And I have added it in the text.

5. The definition and classification of the CCS-GI refers to the pathology of CCS-GI, but I don't think it is appropriate to mention it here. So I have deleted it, and used "For the routine method to diagnose and treat of CCS-GI" instead.

Answer to the reviewer 02742218:

Thank you very much for your advices, I have corrected these mistakes in the revision.

1. I have polished the article by AJE.

2. I have rewrited the references according to the author's guideline given by the journal

3. I have added scale to the figure 3 and 4.

4. I have inserted magnification information in figure 5a and figure 5b.
