June 3, 2013

Dear Editor,

On behalf of all authors, I would like to confirm that the English text of the manuscript '*Differential diagnosis of obsessive-compulsive symptoms from delusions in schizophrenia: a phenomenological approach*' submitted to the World Journal of Psychiatry, has been thoroughly revised according to the suggestions of a native English speaker.

Therefore, I believe that the language of our manuscript has reached Grade A according to the journal standards.

Sincerely yours,

**Panagiotis Oulis, MD, PhD**
