**3** Reliability and validity of the Dutch version of the VISA-A questionnaire for Achilles tendinopathy and applicability to non-athletes

Inger Sierevelt, Maayke van Sterkenburg, Hans Tol, Bella van Dalen, Niek van Dijk, Daniel Haverkamp

#### Abstract

##### AIM

To translate and validate the VISA-A questionnaire into the Dutch language (VISA-A-NL) and to assess its applicability to non-athletes.

作者: J Robinson - 2001 - 被引用次数: 395 - 相关文章

The final version consisted of eight questions that measured the domains of pain, function in daily living, and sporting activity. Results range from 0 to 100, where 100 represents the perfect score. Its validity and reliability were then tested in a population of non-surgical patients with Achilles tendinopathy (n = 45), presurgical ...
