**ESPS Manuscript NO: 21494**  
**Manuscript Type: Review**

Science Editor, Editorial Office  
World Journal of Clinical Oncology

Dear Dr. Kong,

We would like to thank the reviewers for reviewing our manuscript entitled : "Magnetic Resonance Imaging for Prostate Cancer before Radical and Salvage Radiotherapy: what Radiation Oncologists need to know", submitted as a review article to *World Journal of Clinical Oncology*.

**Response to the Editor's comments:**

We have made the requested formatting changes and included the requested documents. Index is as follows:

1 32964-*Revised manuscript*. We revised our manuscript according to the reviewers' comments and to the Editor's indications. We updated the manuscript according to the Guidelines and Requirements for Manuscript Revision-Review. The only exception is in the Title, with more than 12 words because of our previous agreements with the Editorial Office.

2 32964-*Answering reviewers*. Please find below the responses to reviewers.

3 32964-*Copyright assignment*. We signed the Copyright Assignment form.

4 32964-*Audio core tip*. We provided the audio core tip.

5 32964-*Conflict-of-interest statement*. We provided the conflict-of-interest statement as signed pdf file.

6 32964-*Google Scholar*. We subject the final title of the manuscript to Google Scholar search, and store screenshot images of the results

8 32964-*Language certificate*. We provided the language certificate.

7 32964-*Grant application form*. The copy of the full approved grant application form(s) or funding agency copy of any approval document(s)/letter(s) were not necessary because we had no fundings to declare, as we stated in the signed form.

**Response to reviewer 00724492**

We are grateful for the positive comments.

No revisions were suggested by this reviewer.

**Response to reviewer 00469307**

We are grateful for the almost all positive comments.

*Reviewer requested summarize the manuscript.*

We have summarized the manuscript and have removed to the section of active surveillance. Furthermore we have removed the description of MRI sequences in recurrence after radical prostatectomy and the studies about salvage radiotherapy with dose escalation

Thank you in advance for your consideration; we look forward to hearing from you soon.

Yours faithfully,
