The Human Investigation Review Board on its last meeting discussed the ethical relations of the research proposal to be carried out at the Department of

Prof. Dr. Molnár Tamás egyetemi tanár
Szegedi Tudományegyetem, Általános Orvostudományi Kar, Szent-Györgyi Albert Klinikai Központ, Lsz. Belgyógyászati Klinika
(6720 Szeged, Korányi fasor 8-10.)

The title of the proposed project is:

A kapszulás endoszkópia szerepe a posztoperatív recidiva kimutatásában műtéten átesett Crohn betegeknél.

The scheme of the experiments complies with the ethics of research. It agrees with the declaration of the Medical Word Federation proclaimed in Helsinki in 1964, therefore, the Human Investigation Review Board does not raise any objection to it from ethical point of view and supports it.

Szeged, 22-Jun-2015

Dr. Wittmann Tibor
President of the
Human Investigation Review Board
University of Szeged
Hungary
