Use and barriers to chromoendoscopy for dysplasia surveillance in inflammatory bowel disease

Shukla R *et al.* Chromoendoscopy for dysplasia surveillance in IBD

Richa Shukla, Mark Salem, Jason K Hou

Abstract

Traditionally, patients with inflammatory bowel disease (IBD) have been thought to be at increased risk of developing colitis-associated colorectal cancer. Although there are recent data suggesting that rates of colitis-associated cancer in IBD patients is declining, current guidelines still recommend regular dysplasia surveillance for early detection and prevention of neoplasia in patients with IBD. White-light endoscopy with random
