Return to sport following tibial plateau fractures: A systematic review

Greg AJ Robertson, Seng J Wong, Alexander M Wood

Abstract

Aim: To systemically review all studies reporting return to sport following tibial plateau fracture, in order to provide information on return rates and times to sport, and to assess variations in sporting outcome for different treatment methods.

Methods: A systematic search of CINAHAL, Cochrane, EMBASE, Google Scholar, Medline, PEDro, Scopus, SPORTDiscus and Web of Science was performed in January 2017 using the keywords 'tibial', 'plateau' 'fractures', 'knee', 'athletes', 'sports', 'non-operative', 'conservative', 'operative', 'return to sport'. All studies
