JOURNAL EDITOR-IN-CHIEF (ASSOCIATE EDITOR) COMMENTS TO AUTHORS

This is an interesting article of the endoscopic treatment using Hook knife for Zenker's diverticulum (ZD). Endoscopic myotomy using Hook knife is one of the treatment options for ZD which is not rare disease in Western countries because this method has high success rate and less invasion. It is necessary to investigate more cases and to evaluate the stability of technique and the safety of this method. This article should be accepted in World Journal of Gastrointestinal Endoscopy.
