

March 28, 2017

To the Editors:

I want to take this opportunity to thank you for your kind attention. The following changes have been made to the original manuscript according to the provided suggestions:

- The sentence "Final histopathological report stated the presence of retroperitoneal epithelioid sarcoma positive for cytokeratin and vimentin, negative for CD34 (Figure 4)", has been rephrased, taking out the "negative for CD34".
- The "EP" abbreviation was changed to "ES" since it was a typing error.
- Reference 4 (now #5) was corrected and the year was added.
- The style for journal references was reviewed and corrected as needed.
- Figures 4c and 4d are now in the same magnification (4c was changed).
- Arrow pointing to the lesion were added in figures 1 and 2.
- A citation was added in the introduction according to the suggestions of one of the reviewers (cited y number 4).
- The article was revised and changed according to the Guidelines for Revised Manuscript: Case Report.

Thank you!

José A. Coronado MD.

Mexico, city. Mexico
