		<input checked="" type="checkbox"/> No	

COMMENTS TO AUTHORS

1. I would include some epidemiological data to confirm the lesser rate of side-effects that 2nd generation glucocorticoids have vs. 1st generation 2. When comparing BDP with PP, last sentence is confusing because the article in which BDP is less effective is not mentioned at all. 3. Before conclusion it would be great if you could include some thoughts about the role of epigenetics in GC dependence (see Harris RA et al. Epigenetics. 2013 Feb;8(2):157-63)

COMMENTS TO AUTHORS

To: Editorial Board World of Journal Gastroenterology Title: "Glucocorticosteroid Therapy in Inflammatory Bowel Diseases: from Clinical Practice to Molecular Biology"

Dear Editor, I read through this manuscript and I think that: - The English of the text should be revised. - The authors should include a table gathering the main findings from literature. - Please consider and discuss the paper from Principi M et al. J Crohns Colitis. 2013 Nov;7(10):e427-33.
