

**Supplementary Figure 1 Alterations of body weight in C57BL/6J mice.** Six-week-old female mice were pretreated DW or HRW for 1 week. Then, mice were fed a liquid diet containing isocaloric dextrin maltose or 5% EtOH for 12 weeks. Body weight was determined. <sup>a</sup>*P* < 0.05 *vs* control group, <sup>b</sup>*P* < 0.05 *vs* EtOH group, and <sup>c</sup>*P* < 0.05 *vs* silymarin group.
