Medication non-adherence in bipolar disorder: review of rates, demographic and clinical predictors

Subho Chakrabarti

Abstract

AIM: To conduct a systematic search for all studies examining rates and demographic and illness-related determinants of medication non-adherence in BD.

METHODS: A comprehensive literature search was undertaken of six English-language databases to identify published articles on medication non-adherence in BD from inception till December 2016. Any article, either a review or an original-research article was examined for its relevance to the subject. All such articles were

Medication non-adherence in bipolar disorder: review of rates, demograph
