

Dear Editor,

I am gratified to resubmit the revised version of our manuscript (ESPS Manuscript NO: 33969), entitled, "Further the liquid biopsy: gathering pieces of the puzzle of Genometastasis Theory".

I am uploading the conflict-of-interest statement, with corresponding-author sign in PDF format and I incorporated the statement as a footnote. I am also providing the professional title of the corresponding author and uploaded the .ppt file with the figures.

We acknowledge all reviewers their proper comments and suggestions. We have addressed point by point all their questions, and have tackled all the recommendations and applied the required changes. Since the language evaluation of two referees has been "A", we presume that professional editing is not necessary.

Thank you for considering our article for publication in the World Journal of Clinical Oncology.

Sincerely,

Damián García-Olmo
