Long non-coding RNAs in hepatocellular carcinoma: Potential roles and clinical implications

Niu ZS *et al.* lncRNAs in hepatocellular carcinoma

Zhao-Shan Niu, Xiao-Jun Niu, Wen-Hong Wang

### Abstract

Long non-coding RNAs (lncRNAs) are a subgroup of non-coding RNA transcripts greater than 200 nucleotides in length with little or no protein-coding potential. Emerging evidence indicates that lncRNAs may play important regulatory roles in the pathogenesis and progression of human cancers, including hepatocellular carcinoma (HCC). Certain lncRNAs
