Retrospective Study

Prevalence and Outcome of acute kidney injury, as defined by the new KDIGO guideline, in very low birth weight infants

Maisa Al Malla, Nisha Viji Varghese, Mustafa AlAbdullatif, Hassib Narchi, Mohammad Khassawneh

Abstract

Background

Acute kidney injury (AKI) ⁸ is common in very low birth weight (VLBW) infants. A unified and simplified definition, which classifies neonatal AKI into three stages using both changes in serum creatinine and urine output, has been suggested by the Kidney

Prevalence and outcome of acute kidney injury, as defined by the new KDIGO guideline
