		<input checked="" type="checkbox"/> No	

## COMMENTS TO AUTHORS

1. What was the method utilized to measure conjugated bilirubin? 2. What protections were utilized to protect the samples from light? 3. How were samples obtained? heelstick, venipuncture? 4. How was hemolysis assessed and what effect did this have on bilirubin measurements?

## COMMENTS TO AUTHORS

This retrospective single-center study may contribute to early detection of the cause of conjugated hyperbilirubinemia in term infants. The text is clearly arranged and concise. Minor language polishing is necessary.
