## PEER-REVIEW REPORT

**Name of journal:** World Journal of Clinical Cases

**Manuscript NO:** 34012

**Title:** Juvenile hemochromatosis: HAMP mutation and severe iron overload treated with phlebotomies and deferasirox

**Reviewer's code:** 01809232

**Reviewer's country:** Canada

**Science editor:** Yuan Qi

**Date sent for review:** 2017-05-04

**Date reviewed:** 2017-05-18

### COMMENTS TO AUTHORS

The work is a case report on a juvenile hemochromatosis patient due to a HAMP mutation. The authors demonstrate successful management of this patient with a combination of classical phlebotomy with iron chelation therapy using deferasirox. This approach led to a significant decrease in iron burden and, moreover, to improvement of clinical symptoms. The manuscript is well-written. The findings are convincing and have important clinical implications. Unfortunately, the authors “were not able to perform MRI measurements before and after inclusion of the deferasirox as an adjuvant”, but measured liver iron content after combined therapy and found physiological values. It would be interesting to provide data on cardiac iron load before (if available) and after treatment.

### COMMENTS TO AUTHORS

Dear WJG Team, I have reviewed some articles for WJG. But, in this excellent paper, I am not able to review because I am the corresponding author (I sent mail saying in the time when I accepted to review without attention). Best wishes, Paulo Paulo Caleb J L Santos, PhD Adjunct Professor Department of Pharmacology - Federal University of Sao Paulo (EPM-UNIFESP) Collaborator researcher in the Laboratory of Genetics and Molecular Cardiology - Heart Institute (InCor)/ University of Sao Paulo Medical School (HC/FMUSP) Adress: 03 de Maio St. INFAR, 4º andar - Vila Clementino - São Paulo, SP ZIP Code: 04044-020 - Mobile p.(05511)96566-9992 - Phone(05511)5576-4848/Voip 1030
