

## ANSWERING REVIEWERS

August 25, 2012

Dear Editor,

Please find enclosed the edited manuscript in Word format (file name: 3458-review.doc).

**Title:** Potent trophic activity of spermidine supramolecular complexes in in vitro models

**Authors:** Carlo A Ghisalberti, Alberto Morisetti, Alessandro Bestetti and Gaetano Cairo

**Name of Journal:** *World Journal of Biological Chemistry*

**ESPS Manuscript NO:** 3458

The manuscript has been improved according to the suggestions of reviewers:

2 Revision has been made according to the suggestions of the reviewer 00418345

1) *The authors use too many abbreviations. They used abbreviated words even for common terminologies such as spermidine and supramolecular complex. Therefore, it becomes difficult when we read this manuscript because we cannot memorize such flood of abbreviated words. Please do not use too many abbreviations. Keeping original words are important for readers.*

As requested, most of the abbreviations more frequently used in the manuscript, such as spermidine, supramolecular complexes, reconstituted vaginal epithelium, ecc. have been eliminated.

2) *References are very old and give old-fashioned work for this manuscript. Please add references published after 2010 more.*

As suggested, 9 out of a total 34 references have been updated.

3 References and typesetting were corrected

Thank you again for publishing our manuscript in the *World Journal of Biological Chemistry*.

Sincerely yours,

A handwritten signature in black ink, appearing to be 'GC' followed by a flourish.
