ESPS Manuscript No: 347

The manuscript has been improved according to the suggestions of reviewers:

1. Format has been updated

I updated the format of reference numbers in the context.

2. Revision has been made according to the suggestions of the reviewer

(1) Running title, and Key words were added.

3. References and typesetting were corrected

4. Additional improvement

(1) I added one author: Kohji Nishida.

I apologized for adding one author. He contributed to performing ophthalmological examination of the patients, and revised the manuscript. The authors of my manuscript lacked his name by mistake at the first submission.

(2) I added a few words in abstract.

The revision policies of BPG for case report says abstracts of no less than 128 words should accompany.

The abstracts of my manuscript had 125 words, and added 4 words.

Thank you again for publishing our manuscript in the World Journal of Gastroenterology.

Sincerely yours,

Shoichiro Kawai, MD
